SPECIFICATIONS OF INSURANCE VERIFICATION SYSTEM

1) Insurance Verification System is a Windows based computer application

2) I.V.S. was written, designed and produced by DesignScan, Inc.

3) System has been up and running since 2001

4) System requires any internet ready computer

5) Be an authorized company to issue auto insurance in that state or

6) Be a certified inspection station

7) Must have unique "log in" and password to access system

8) Windshield inspection sticker affixed to lower driver's side of windshield

9) Individual states will design their own unique sticker

10) Sticker will have maximum size of 3"x 5"

11) Sticker will have maximum space of 5" from bottom of windshield

12) Only state issued preprinted horizontal barcode/RF tag allowed

13) Barcode/RF to have maximum ¼" space from each side

14) Inspection stations will have pen sized scanner for input of barcodes/RF tag

15) Only policies issued by said company will be accessible to that company

16) Drivers won't need to be present to have vehicle scanned

17) Only trained police officers will scan autos

18) All pertinent information will print out on portable, hand held scanners

DesignScan's Wireless Insurance Verification System

1. Be an authorized auto insurance company or inspection station
2. Have a unique password
3. Use any internet computer
4. Windshield stickers are to be no more than 3"x5"
5. Horizontal barcode to be no closer than ¼" of either side
6. Barcode/RF to be of such height as to allow scanning from side
7. Background of sticker to be a light color such as white or off white
8. Barcode/RF information to be black
9. Stickers to be sunlight resistant and be made to last a minimum 18 months

The following instructions "walk" you through the steps of the system and describe each computer screen that users will see as they download information on an individual policy. Also, companies can "log on" to system to add or cancel policy immediately. No more need to worry about missing paperwork, long wait times at check points, etc. Scan time is under 15 seconds. No more fake cards, after scan the system will authenticate your policy on the spot.

A) Page 1) DesignScan's home page, user enters account type, login ID and password information.
B) Page 2) Two options: Create Insurance Policy or List/Edit Policies.
C) Pages 3 & 4) To create a new policy user must fill in all required fields (policy number, effective date, expiration date, status of policy---either active or cancelled---, name, address, city, state, zip, phone number, vehicle identification number, year, make, model and color of vehicle then submit.
D) Pages 5 & 6) Completed form ready to download to server.
E) Page 7) Verification of successfully submitting new policy.
F) Page 8) After submitting you return to the "choice" page.

Page 9) This is the page if you choose to list/edit a policy. From here you can edit any policy that YOUR company has issued.

Page 10) Logging in as an inspection station, user fills in required fields and logins.

G) Page 11) Window inspector is brought to.

H) Page 12) User enters V.I.N. (Vehicle Identification Number)

I) Page 13) User cross references and authenticates V.I.N.

J) Page 14) Inspection station enters barcode or RF number, date, mileage on vehicle and license plate number.

K) Page 15) Completed form ready to download

L) Page 16) Verification of successfully submitting changes to policy.

M) Pages 17 & 18) Information that appears on scanner after being read at checkpoint, parking lot, etc....
